

ページ境界の確認

Boundary review

8 件の編集者による境界 / editor-selected boundaries

PageThread Field Notes, synthetic editorial edition, 2026; page labels supplied for demonstration

既存の本文構造・文言を保ち、指定位置にページマーカーとページ一覧を追加します。

The chosen locations add page markers and a page list while retaining the original prose and structure.

検証の範囲 / Scope

引用句は大文字・小文字を区別し、XML の空白（タブ・改行・復帰・半角空白）の連続のみを半角空白 1 文字にまとめます。句読点、NBSP、全角空白、Unicode 正規化は変更しません。対応する 1 ブロック内だけを検索します。

Matching is case-sensitive within one supported block and collapses only XML whitespace. This report verifies the selected source locations and generated structure, not whether the editor supplied the correct print boundaries. It does not certify all reading systems, overall accessibility, rendering fidelity or the final EPUB 3.4 standard. Limits: 25 MiB input/output, 100 MiB expanded, 200 spine documents, 500 boundaries, plus XML/search-work caps. No external assets are loaded, no source is uploaded and no file is automatically saved.
